

# God Club

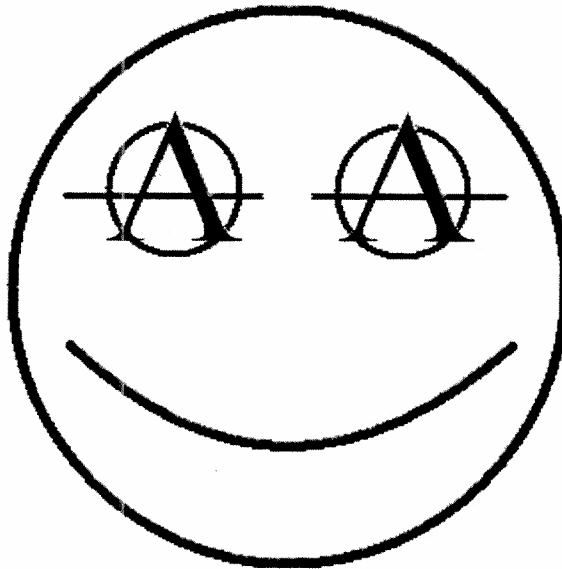

**deviance with purpose!**

*It is a rejection of the aesthetic concern as paramount to the production of good art and the appropriation of nothing more than a feminist history that has informed us to directly equate our identities with our politics. Our name is not intended to invoke the death of your spiritual selves but instead the rebirth, and reclaiming of yourselves as your own subject, your own idol, your own God. Hedonism is a virtue as cathartic experience is central to redefinition, however, we urge you to break out of your post-wave party face to adorn an active fist or limp wrist instead. God Club urges you to take control of your movements and to place earning the fade on your jeans at the bottom of the list of reasons why you think resistance might be a nice change of pace.*
